Education

Government College of Engineering, ch.SambhajiNagar Aurangabad *NOV 2022 – JUNE 2026*
Btech in Computer Science and Engineering(CSE)

- CGPA: 9.25

Indian Institute of Technology Madras (IITM) *NOV 2022 – JUNE 2026*
BS in Data Science and Programming

- CGPA: 8.69

Skills

-
- Programming Languages: Python,SQL, C,Java,JavaScript
 - Frontend Tech: HTML, Tailwind CSS, React
 - Backend Tech & Frameworks:Python-Flask,SocketIO
 - AI-ML Frameworks: Pandas,Numpy,Scikit-learn,PyTorch,NLP clustering,RAG(Rule-Based clustering),GenAI
 - Databases: Sqlite, MySQL, Oracle
 - Core Subjects: Data Structure and Algorithm, Machine Learning,Deep Learning Object-Oriented Programming, Operating System, Networking, Database Management
 - Soft Skills: Leadership, problem solving, teamwork
 - Tools & Platforms: Linux, Google-Colab, MS office

Projects

Kaggle IITM Regression Challenge (Top 20 / 1600) *Python, XGBoost, Optuna, Scikit-learn*

- Built a regression pipeline for purchase value prediction using XGBoost and advanced hyperparameter tuning (Optuna, RandomSearchCV).
- Engineered interaction and session-based features, handled categorical data with Ordinal Encoding.
- Achieved top **1.25%** rank on leaderboard (IITM Capstone Project, Grade: S) in a highly imbalanced regression task with real-world behavioral with a leaderboard score of **0.702 R²**, ranking at the position **20** out of 1600+ participants.
- Compared models including LightGBM, RandomForest, and GradientBoosting; finalized model via cross-validation.

Quiz Master – Web Application *Flask, SQLAlchemy, Redis, Celery, HTML, JavaScript, Jinja2*

- Developed a full-stack quiz application (IITM Capstone Project, Grade: S) with real-time scoring, adaptive question progression, and timed submissions.
- Integrated **Redis caching** and **Celery job scheduling** for background quiz submission, leaderboard updates, and session management.
- Designed a scalable Flask backend supporting concurrent users, efficient query handling, and asynchronous task execution.

Insightify — AI-Powered Customer Insight & Action Center *Python, Flask, Transformers,*

- Architected a **Hybrid RAG pipeline** (BART-Large + FLAN-T5) to generate policy-compliant customer responses with controlled, low-hallucination output.
- Built a **zero-shot routing engine** using DistilBART, auto-classifying feedback into 6+ departments with zero manual intervention.
- Added **unsupervised clustering** and RoBERTa sentiment analysis to surface emerging issues and enhance dashboard insights.
- Reduced API latency by ~75% via **multi-threaded background model loading** and in-memory caching.

Business Data Management Report *Python, Pandas, Excel*

- Conducted an end-to-end business data analysis for a real-world firm (Grade: A), delivering actionable insights through EDA.
- Performed trend analysis, data visualization, and built a formal report with strategic recommendations for stakeholders.

Certifications

-
- 📄 Completed the Foundational Level in Data Science from IIT Madras
 - 📄 Earned the Diploma in Programming from IIT Madras with a CGPA of **9.26**
 - 📄 Earned the Diploma in Data Science from IIT Madras with a CGPA of **9.07**
 - 📄 NPTEL Certification in Entrepreneurship
 - 📄 NPTEL Certification in Soft Skills Development
